Welcome to our 2016 parts catalog

You may notice some changes this year. We now speak Y-Block too! Please consider us for your 1954-1962 Y-Block parts in addition to your 1932-1953 Flathead parts. We are building our inventory so please call if you do not see what you are looking for.

The online store (www.shopvanpeltsales.com) continues to grow. It is a work in progress. Our parts inventory is much broader than what is available on the store. Please call us if you don't see what you are looking for. We can be reached at 513-724-9485 Mon-Thurs 9 AM to 5:30 PM Eastern time.

ELECTRICAL - Alternators/Generators			
G- 10000-6	Rebuilt Stock 6V Generator - Check for model availability		\$125.00
	Core charge for rebuilt stock generator		\$50.00
A- 10000-6F	New 30A Alternator - 6V - with wide belt pulley for fan mount		\$229.00
A- 10000-6P	New 30A Alternator - 6V - with wide belt pulley w/o fan mount		\$187.00
A- 10000-12F	New 60A Alternator -12V - with wide belt pulley for fan mount		\$229.00
A- 10000-12P	New 60A Alternator -12V - with wide belt pulley w/o fan mount		\$187.00
Note: Alternators are the self regulated 1 wire type. Require a mounting bracket (see below)			
AB 10	Alternator Bracket (39-48 type - no fan mount holes)		\$75.00
AB 20	Alternator Bracket (42-48 type - with fan mount holes)		\$75.00
AB 30	Alternator Bracket (49-53 type - with fan mount holes)		\$75.00
Note: Brackets are designed for mounting directly to the stock Ford/Merc intake manifolds.			
WP- 100	Alternator Pulley - Wide Belt - for GM type alternators		\$16.00
ELECTRICAL - Voltage Regulators - 6 Volt			
B- 10505	Voltage Cut-Out (28-39) - 6V - 15 Amp (mounts on top of generator)		\$21.00
B- 10505-D	Voltage Cut-Out (28-39) - 6V - 20 Amp (semi conductor type)		\$56.00
B- 10505-DS	Voltage Cut-Out (28-39) - 6V - 20 Amp (same with Ford script)		\$64.00
Note: The semi-conductor type is heat sinked and cad plated. All are wired for positive ground application with 3rd brush type generator			
8A- 10505	Voltage Regulator (39-55) - 30 Amp (replaces 01A & 51A-10505)		\$54.00
ELECTRICAL - Voltage Regulators - 12 Volt			
C3TZ- 10505-B	Voltage Regulator (56-up) - 30 Amp (replaces B6A & B7A & C1TZ)		\$69.50
C2AZ- 10505-C	Voltage Regulator (56-up) - 40 Amp (replaces B6A-B & B7A-A)		\$79.50
ELECTRICAL - Generator Parts			
40- 10043	Set of 3 brushes (1929-39) - no wire		\$2.75
91A- 10043	Set of 2 brushes (1932-39) - single wire		\$4.50
01A- 10043	Set of 2 brushes (1940-62) - twin wire		\$5.25
91A- 10057	Spring - brush Holder (39-59) - 2 required	Each:	\$4.00
7RA- 10094	Bearing - DE (1940-53 varied applications)		\$7.00
B- 10128	Bushing - CE (1932-36) 0.627" id x 0.754" od x 0.968" L		\$1.50
18- 10128	Bushing - CE (1932-38) 0.627" id x 0.754" od x 0.950" L		\$2.50
78- 10128	Bushing - CE (1937-53) 0.673" id x 0.797" od x 0.796" L		\$1.50
ELECTRICAL - Misc Engine Sender Units			
8A- 10884	Water Temp Sender - 1 Terminal		\$55.00
8A- 10990	Water Temp Sender - 2 Terminal		\$55.00
41A- 9278	Oil Pressure Sender (80 psi) - Original type for stock gauge		\$45.00
ELECTRICAL - Starters (32-53 V8)			
18- 11002-NSB	Starter with bendix (new) - 6 volt (barrel starter drive)	Manual Trans Only	\$169.00
18- 11002-NTB	Starter with bendix (new) - 12 volt (barrel starter drive)	Manual Trans Only	\$169.00
18- 11002-NSF	Starter with bendix (new) - 6 volt (B11350 starter drive)	Manual Trans Only	\$210.00
18- 11002-NTF	Starter with bendix (new) - 12 volt (B11350 starter drive)	Manual Trans Only	\$210.00
Note: The new starters include modern barrel type bendix, except when we exchange the drive for the B11350 which is made in the USA. The B11350 drive is recommended when installing on 1949-53 V8 engines. To order the basic unit without any starter drive, the model suffix becomes -NSX (6V) or -NTX (12V). Deduct \$10.00 from the \$169.00 barrel drive price.			
ELECTRICAL - Starters (56-62 V8)			
B6A- 11002	Starter with Bendix (rebuilt) - 12 volt - Barrel starter drive		\$139.00
ELECTRICAL - Starter Parts			
18- 11057	Set of 4 Brushes (1928-53)		\$6.50
18- 11052	Bushing - CE (1932-53) 5/8" id x 3/4" od x 0.595" L		\$1.50
B- 11059	Spring - Brush Holder (32-53) - 4 required	Each:	\$1.00

SERIAL NUMBER NOTES

- (a) Ford changed production in late 1947 from the G series to the new H series six cylinder engine. They started new serial numbers for the new engine.
- (b) The serial numbers were stamped without any commas or superfluous 0's (zeros). They have been shown here to help identify the general starting number. For instance, the first 1939 Mercury would have a "99-1" stamped as its serial number (rather than 99-001).
- (c) The serialization applied to trucks and commercial vehicles using these Ford engines. They may have different serial prefixes, but would be inclusive within the serial ranges shown.
- (d) The available records do not show the beginning number for 1939 models with the 60hp V8 engine. According to the Early Ford V8 Club 1938-39 Ford reference book, Ford held up production of the 60hp engine for awhile due to overstock. They stopped building the engine at #54-468,967 on December 23, 1937 and did not resume production until April 20, 1939 with #54-476,288. This indicates that Ford was able to build all of the rest of the 1938 **60hp** vehicles and most of the 1939 **60hp** vehicles with late 1937 engine production inventory.
- (e) According to the same EFV8 Club reference book, the first model year 1939 production V8 (85hp) was #18-4,657,660 which was built Sept. 6, 1938. This conflicts with the "first" number listed above (a difference of 3,341 units).
- (f) In the 1938 model year Ford changed from the 21 stud 85hp V8 to the 24 stud engine. The change occurred with #18-4,380,120 on November 24, 1937.
- (g) Production figures for the 60hp engine must be considered for various groups of numbers that were pulled for reworked engines or simply a group of numbers that simply weren't built (example: a small group of 127 serial numbers not assigned at the end of 1939 motor production.) Although a "total" is shown in the table above, it does not account for such missing engines. Per "The Standard Catalog of Ford 1903-2003" total production of 1940 passenger vehicles with the 60hp V8 is 231,425 units (including coupes, Tudors, Fords, & station wagons). This does not include additional totals of 60hp engines used in trucks and commercial vehicles.
- (h) For more complete Data Plate decoding information on 1949 thru 1953 Ford cars, refer to the decoding chart. Additional letters between the beginning two digits (letter/number) and the rest of the serial number indicate the assembly plant location. Refer to the decoding chart.
- (i) Letter from the Ford Motor Company to all Ford offices (dated Nov. 4, 1947): "Engine and model numbers for 1948 (Ford) cars - the lowest number used with 1948 prefixes for six-cylinder passenger car engines is 87HA-0536. Lowest number used with 1948 prefixes for V-8 passenger car engines is 899A-1984859. Due to inventory of engines at various assembly plants, some 1947 models will have higher numbers than the above. However, the prefix changes will definitely identify the 1948 models from the 1947 models." The serial numbering shown in the chart above reflects this numbering variance.

Other: From 1932 through 1948 vehicles, Ford Motor Company stamped the serial number into the top of the driver's side frame rail in three locations. This same number was also stamped into the top of the transmission-to-engine housing portion of the transmission. This location was visible when the floorboard and trans cover plate were removed. Of the frame stamped serial numbers, only the forward-most stamping was visible when looking down into the engine compartment (located between the front crossmember and the dash (firewall)). The two other frame locations are visible only when the body is removed from the frame. The serial numbers were metal stamped with numbers/letters approximately 1/4" in height. The number (including the prefixes shown) was always preceded by (and followed by) a stamped "star" similar to an asterisk. It is believed that this was done to prevent someone from fraudulently adding a digit to the beginning or ending of a serial number in order to alter its identification.

Resources: The information given in this chart is based on the data given in "MOTOR'S AUTO REPAIR MANUAL". Two versions were referenced: the 1935 to 48 book and the 1946 to 56 book. Also, "The 1938-39 Ford Book" published by the Early Ford V8 Club of America.

TERMS OF SALE

PLACING AN ORDER BY PHONE: You may phone your order in to our sales office during regular business hours (Monday to Thursday from 9:00AM to 5:30PM Eastern Time – Phones are closed on Fridays). USA customers can use our toll free telephone number to place an order: **1-800-299-7496**. International customers who wish to order by phone must use: **1-513-724-9485**. If we are out of the office or on another telephone call, please leave a message, and we will try to return your call as soon as possible. Orders may also be faxed in at any time to: **1-513-724-9487**.

PLACING AN ORDER ONLINE: You may order from our online store (not all products are available this way) at any time - day or night. If the part is not listed in the online store, you must order that part by telephone during our regular office hours. Due to the difficult nature of pricing shipping charges accurately in the online store, we must calculate the shipping cost for your online orders in a conservative way. This may result in apparent high shipping cost. We will adjust the true final shipping costs for online orders to correct for any over or under pricing of shipping charges. This may result in a secondary charge to your credit card, or in a credit to your card, as the case may be.

ORDER INFORMATION: We ask that you help us help you by providing as much application detail as possible when placing an order. There are many very similar parts that can be confused with one another. Sometimes a part number is not available, but we can identify the item you need based on our experience, and your efforts to provide additional information, such as measurements or pictures. Refer to our website's parts drawings and our sales department to help guide you.

MINIMUM ORDER: The minimum order is \$10.00 net (excluding shipping costs and taxes and fees). Please consider adding items to your order if it is not sufficient to make the minimum. Our minimum shipping/postage charge is \$8.00.

TERMS OF SALE: All orders must be paid for at the time of the order. We accept Visa, MasterCard, and Discover Card credit cards. We also accept money orders and checks, but we must allow approximately 10-14 days for these to clear the bank before the order can be shipped. We do not accept bank wire transfers. We do not accept PayPal. We will not ship any orders COD. Unless otherwise stated, the shipping and handling costs will be added to all orders. Any applicable sales taxes will also be added to qualified orders. International orders may require a written confirmation of the order, which may be provided via email or facsimile.

MERCHANDISE RETURNS: Excluding electrical or electronic parts and books/literature, merchandise may be returned upon request, within 60 days from the invoice date. Items sent to you in good faith, that have fulfilled the order correctly, may be returned with prior authorization only from VANPELT SALES LLC. Please contact us by phone or in writing to request a Return Authorization. Returned merchandise must be sent to us freight prepaid, and is subject to a 15% restocking charge. All returns must be in their original packaging and in original or new condition. Additional packaging costs may apply for merchandise that arrives in torn, crushed, or otherwise damaged or missing packaging. NO returns after 60 days from the invoice date. NO returns are allowed for any books or manuals at any time. All literature sales are considered final.

Defective merchandise will be accepted for return on a case-by-case basis. **Prior authorization is required** before sending such merchandise back to us. Credit will be issued upon inspection and confirmation of defects. In no case will we be liable for additional costs such as labor, or replacement parts you purchase elsewhere. Items will be replaced or credited solely at our discretion. NO returns after 60 days from the invoice date.

Electrical or electronic merchandise (such as ignition parts, starting system parts, etc) are **NOT** subject to return for credit. All sales of such electrical/electronic components are considered final. Merchandise found to be defective must be returned with **prior authorization only**. Upon inspection, any defective electric components will be replaced if our inventory supports it, or credited to you if we cannot replace it. Items will be replaced or credited at the sole discretion of VANPELT SALES LLC. NO returns after 60 days from the invoice date.

TERMS OF SALE – continued

METHOD OF SHIPPING: We normally use UPS or the US Postal Service for most parts orders, and will ship using our discretion for the most efficient and cost-effective method. Some items tend to fare better with one shipper than another. If you have a preferred shipper, please make that request at the time you place your order, and we will try to accommodate your preference. Some parts come to us in little or no packaging that is unsuitable to re-ship. When packing your order we often have to use additional packing materials, or specialized cartons, which may result in a small extra charge beyond the actual shipping costs. Most orders that are shipped via the USPS will require their specialized extra services (insurance, etc). UPS also charges extra for any insurance beyond the basic \$100.00 coverage. Any such extra charges will be added to the actual freight shipping costs. The minimum shipping charge is \$8.00.

PRICING: All prices are quoted in US dollars. Prices are subject to change without notice. Prices will be those in effect at the time of the order. Please confirm your cost when placing an order as printed prices or online pricing could change.

INTERNATIONAL CUSTOMERS: Due to the additional customs paperwork, we must add a \$10.00 documentation charge to all orders. This fee is per carton, since each package must have its own customs form. This charge will be added to your invoice and identified as a "Document Fee".

BRAND PARTS: Parts offered for sale herein may be NOS (new-old-stock), or NORS (new-old-replacement-stock), or modern new aftermarket brand parts, or modern new reproduction parts. Used parts are identified as such where available and sold. We will supply new parts on all orders, unless otherwise requested by the customer, or where the only part available is a used item (which is stated in our pricing). Our new parts could be from any of the aforementioned sources. Please inquire when ordering if this is important to your needs.

PART NUMBER APPLICATIONS: Many part numbers listed in our catalog or online include a model year reference, which generally spans the earliest to the latest models that could have used this particular part. Sometimes, the overall span of model years can include both cars and trucks, but perhaps the part was not used for the full duration on your vehicle. Or the part may have specific applications that are defined by your engine or other driveline details. The model year reference is a guide only since we do not have room to include all the possible variations in the catalog. If your vehicle is a custom-built type with components from different model years, the part you want may not have been used in the model year as used on your title. Please check your application to make sure the part will apply to your vehicle before ordering if you are not sure.

PARTS ORDER QUANTITIES: In general, you may order in any quantity needed. However, certain parts or other products may be in limited supply. The fact that any particular item is listed with a purchase price does not guarantee its unlimited availability. We reserve the right to limit order quantities at our discretion, whether for a limited time or on a permanent basis. If large quantities for any products are required please contact us to discuss the issue.

Note: The 28 tooth cluster gear came in two varieties where you had either a 15 tooth or 14 tooth reverse gear. Both have the same forward gear tooth counts. A Columbia rear axle overdrive would change all the regular ratios effectively. Also, (except for the truck 4 speed and the HD 3 speed gearboxes) most of the gearsets could be applied in any 1932-48 passenger gearbox, and any 1932-51 pickup truck gearbox.

TRANSMISSION REBUILDING

***If you are thinking of rebuilding your transmission
this book will guide you from beginning to end...***

Highlights:
